

OUR COMMITMENT TO THE ENVIRONMENT

Protecting and preserving the environment is a core value of PABCO® Roofing Products. Recognizing these values, we have developed multiple programs and initiatives to address energy efficiency, recycling, and other practices that reduce waste and support sustainable practices.

PABCO® Roofing Products

Recommended by professionals.

GREEN BUILDING PRACTICES

More and more homeowners, builders, municipalities, and government agencies are embracing green standards for their construction projects to help preserve our environment. PABCO® Roofing Products can help by providing products that contribute to green certifications, such as LEED (Leadership in Energy and Environmental Design).

LEED certified buildings are not only good for the planet, but can also help occupants save money through reduced energy and water bills. PABCO® Roofing Products may help contribute to meeting LEED requirements in Materials & Resource – Recycled Content (4.1 and 4.2) and Regional Materials (5.1 and 5.2). All components of a specific category must be considered in total to determine if LEED benchmarks have been met.

LEED locally available materials.

WASTE REDUCTION INITIATIVES

PABCO® annually diverts over 30,000 tons of waste products from landfills to be reused or recycled.

- Asphalt process waste is recycled for use in local road construction.
- Over 98% of water used during production is collected and reused.
- Empty pallets are collected from our distributors, refurbished by a local pallet recycler, and reused. Pallets can be refurbished and reused many times over.
- All excess granules and sand are collected, sorted, and reused in our manufacturing process.
- Recycled materials are utilized in manufacturing, when available.
- Waste limestone is sourced for use as a raw material.
- PABCO® has a comprehensive recycling program that includes:
 - Process waste
 - Cardboard
 - Scrap metal
 - Waste oil
 - Plastic
 - Paper
 - Office waste
